Subject: RE: CAG mission statements

Hi Terri,

Here are a few mission statements from community groups involved in the Superfund process. I hope this helps.

Anaconda:

The Arrowhead Foundation has been working for 30 years to ensure that the community is informed and up to date on superfund issues. It is our mission to interpret information for the public, make it accessible and insure that at times of remediation decision the community is informed and involved. <http://anacondasuperfund.org/>

Butte:

The mission of the Citizens Technical Env. Committee is to help people living in the Butte-Silver Bow Creek area understand and respond to complex technical information related to the area's environmental problems, in order to enable them to participate in a meaningful manner in local, state, federal and industrial deliberations regarding solutions to these problems. <http://www.buttectec.org/>

Columbia Falls:

The CFAC Community Liaison Panel (CLP) purpose is to provide a forum for the discussion and exchange of ideas and opinions about the project. Those involved represent the community, elected officials, project consultants, state and federal agencies, and CFAC.

Subject: CAG mission statements

Hi Robert,

Do you have copies of mission statements from other CAG groups you work with? If so, could you send them to me? It could be interesting to compare them.

Thanks!
